

START WITH WHY

1 I want to watch a specific movie

2 I don't know where it currently
being shown online

(I don't want to pay more than I
have to?)

3 I don't have time to manually
search through listings ~~and~~

4 Sites are not being completely open about
what they do and don't have, and it
changes from month to month and year to
year

Our system can:

Look for a specific movie

- confirm it is the one you want

Show instantly where it is currently
being shown online

- extend to your series, free series, pay-as-you-go?

~~Automatically~~ Query a database to automatically
search through ~~(ten?)~~ the most popular
series eight

Cut through the marketing to show
clear and unbiased information
